## **July-August 2019**

***Celebrating our summer camp for kids living with cancer***

In July we opened our doors to children aged 6-12 years who have or had cancer to join in the fun and games at Baytna Centre in Hebron. This was the FIRST summer camp dedicated for these children. They came from all over the governorate which has a population of almost 1 million!

Thanks to a great corporation of donors and volunteers who did art, English, cooking, aerobics and more and others for making this a memorable summer!

The families had some respite and the children as you can see in the photos enjoyed the activities and the comfort of our little center. They gave each other encouragement and just had fun! We offered the sessions for free as cancer treatment are a costly journey for most. We didn't want an added burden for the families so thanks to some generous donors, we succeeded in not only one week of camp but 4 weeks! Hopefully, we will continue to get donations and volunteers to ensure these children and others living with cancer can come and just be kids. We plan on one day a week camp during the school year and hopefully next summer, a bigger and better daily camp.

## About Patient's Friends Society-Jerusalem

Our registered, charitable organization was founded in 1980. Since 2000 among many other activities we have been providing dedicated psycho social support for women from all over the country diagnosed with cancer and their families. Since 2011 we expanded our services to Hebron and in 2016, opened the first palliative day center in Palestine.
